The best call recorder software makes it simple and easy to record, manage and store calls on your smartphone. Call recording can be a useful and even essential for recording an interview, keeping records of your communications, or just keeping logs of your phone calls for admin purposes. While the basic premise of a call recorder is simple, many of these apps differ when it comes to ease of use, playback, and more. In addition, you'll need to decide whether you're willing to pay for a call recorder or whether you want free software with potentially fewer features. Keep in mind that the laws around call recording vary between states and countries. If you're planning to record a call, it's always good practice to ask the person you're talking to first. With that, let's take a look at the five best call recorder software options you can start using today. You may also like to check out our featured best business smartphones. The best call recorder software of 2022 in full. (Image credit: Google Play) For Android users, there are few free options better than ACR Call Recorder. This simple app features an on/off toggle switch that enables you to automatically record every call that takes place on your phone. One of the best things about it is that it's intuitive. You can search for recordings by contact names and easily share recordings right from the app. It also comes with an auto-delete option so that your phone's storage doesn't fill up with old recordings. The only downside is that if you leave automatic recording off and want to manually start recording for a specific call, you'll need to upgrade to the paid version. (Image credit: Google Play) Many call recording apps only work if your call takes place through your phone's built-in dialing app, not if you use a voice over IP (VoIP) app. But Cube Call Recorder is capable of recording calls through Skype, Facebook, WhatsApp, Slack, and more on Android devices. The free version of this app comes with ads, but it offers most of the essential recording features that users need. You can choose to record every call or list specific contacts for recording your conversations. Starting a manual recording mid-call is free, too. The premium version adds automatic backup, file security, and automatic deletion. For backup, your recordings are synced to Google Drive as soon as your call ends. (Image credit: Google Play) Blackbox Call Recorder bills itself as reliable recorder software made for professionals. It requires a small monthly subscription, but, it brings a number of advanced features together in one place that you won't find elsewhere. For example, you can lock Blackbox to prevent unauthorized access with a password or pin. You can also set up your own file directory to better organize your files, and sort recordings by date, time, or duration. The app also provides you with an on-screen widget that you can use to start or stop recording calls manually. The biggest downside to this platform is that it doesn't work with VoIP calls. So, if you frequently talk over WhatsApp, Skype, or another app, Blackbox Call Recorder won't be able to capture those conversations. (Image credit: Apple App Store) Just Press Record is easily the best call recorder software for iPhones if you're willing to pay a small fee. Part of what makes this app great, especially for Apple fans, is that it's available for iPad and the Apple Watch as well. You can record from your device's microphone or from AirPods. This recorder also features automatic transcription in over 30 languages. You can edit transcripts in a notepad-like tool within the app to get your recordings just right. All of the text is searchable within the app, too. What's more, Just Press Record supports audio editing. You can view the waveform of your audio file and cut out parts you don't need to save space on your device. (Image credit: Apple App Store) Rev Call Recorder is completely free call recorder software for iPhones. There are no limits or in-app ads, but keep in mind you can only register for this app if you have a US phone number. The app is somewhat simple, but gets the basic features right. It records high-quality audio and you can share the files via email, text, or cloud app. That said, you can't record VoIP calls with Rev, and the app won't automatically backup your recordings to the cloud for safekeeping. There's also no way to set the app to automatically record all incoming and outgoing calls. We've featured the best business phone systems. To test for the best call recorder software we searched for a range of popular options as well as took recommendations from people we know who use call recording software regularly. We then tried each platform to see how user-friendly each was, as well as determine what range of tools and advanced options were available. Pricing also came into account when determining our best list. See how we test, rate, and review products on TechRadar. When deciding which of the best call recorder software apps to use, first consider what actual needs you have. For example, someone simply wanting to use one on a casual basis may find a free or cheap option is the most cost-effective while providing all of the necessary tools that would be required. However, if you're planning to use call recording for professional or business purposes, especially with a large number of people and on a regular basis, then you will probably want to look to the higher-end options for the more advanced tools that are included. We've also featured the best project management software. Something went wrong. Wait a moment and try again. Call Recorder for iPhone allows you to save any incoming and outgoing call in seconds. We fixed some minor bugs and improved app performance. Stay with us and enjoy our app! 3,870 Hey, everybody, I decided to share my impression from call recorder for iPhone to help other people understand what they can expect. First, it's very nice and user-friendly. Second, it has plenty of great features. I can record, share and look through all files easily. It is not even necessary to open the app as it works in a background. After downloading, you need only a few secs to run the application and understand how it works. I can sincerely recommend a call recorder for iPhone to everybody who wants to record calls without any limits. Well ya me. I needed copies of my calls last night and listened to them today and well I'm not laughing. I will admit you got me loud and clear but as soon as they answered there's nothing but total silence. Cute. You have not helped one bit. To try and charge such an exorbitant amount in the first place and then not work at all. I guess it's on me to not take the time and check the first recording, but I have a trusting nature. I'm finding out the hard way the just because there's an app on my iPhone doesn't mean it works correctly nor can it be trusted. I feel like the iPhone should have higher standards but they don't. I guess if they are capable of killing batteries quicker they are certainly capable of having unreliable apps on their phones. Wow the more I learn of mankind the more it is heartbreaking. It seems no one is trustworthy, honest, nor just plain kind anymore. So just thought I'd drop a quick to tell you how let down I am once again. Earlier I wrote down so many notes while chatting over the phone. Now, everything is much easier. I record phone calls and listen to them later. The translation option is my favorite one. I have many partners worldwide and their English is not always perfect. After translation, I got a better idea of their answers and suggestions. Finally, I save time and effort, hence my productivity is greatly improved. The developer, Accordmobi, indicated that the app's privacy practices may include handling of data as described below.
